Luke Bingham
Sheriff - Coroner

Purpose of the Lake County Sheriff's Office "Military Equipment" Annual Report

Assembly Bill (AB) 481 approved by Governor Gavin Newsom in 2021, added section 7070 through 7075 of the California Government Code. AB 481 requires law enforcement agencies create a policy and obtain approval from a governing body (Board of Supervisors) to purchase, obtain, and use specified equipment.

This annual report follows section 7072 of the California Government Code. The purpose of this document is to report the possession, use, training, fiscal impact, policy violations, complaints/concerns of current equipment and identify any intended acquisition of equipment, identified as "Military Equipment" per 7070 of the California Government Code, by the Lake County Sheriff's Office.

With respect to costs, funding, annual maintenance expenses and training associated with the identified equipment every effort has been made to be as accurate as possible.

The annual fiscal impact associated with this equipment represents the best approximation at the time this document was prepared. Many factors are considered when determining the annual fiscal impact, such as changes in equipment cost, training hours, wages, travel, per diem, operational hours, maintenance, fuel costs and so on. Several of these factors fluctuate throughout the fiscal year. The approximate fiscal impact during FY 25/26 was $63,122.22

During fiscal year 2025-2026, the Lake County Sheriff's Office purchased three Matrice 4T unmanned aircraft systems (UAS) totaling approximately $32,394.13. During the fiscal year 26/27 the lake County Sheriff's Office also purchased two Avata 2 (UAS) totaling approximately $7,170.32
that met the definition of "Military Equipment" as defined in section 7070 of the California Government Code. Additionally The Lake County Sheriff's Office also transfered a Eagle fifth wheel command post through OES to the Modoc County Sheriff's Office OES division with Board approval.

Additionally, the Lake County Sheriff's Office did not receive a complaint or concern pertaining to the use or possession of the listed equipment and no inventory discrepancies were found during the Sheriff's Office's annual audit, nor were any policy violations identified.

At the time of this annual report, the Lake County Sheriff's Office does intend to purchase or obtain equipment identified in 7070 of the Government Code during the upcoming fiscal year. This is to replace equipment that is timing out.

BOARD OF SUPERVISORS, COUNTY OF LAKE, STATE OF CALIFORNIA
ORDINANCE NO. 3123

AN ORDINANCE ADDING ARTICLE XXIX TO CHAPTER 2 OF THE LAKE COUNTY CODE ESTABLISHING A MILITARY EQUIPMENT USE POLICY

WHEREAS, approved by the Governor on September 30, 2021, California Assembly Bill Number 481 ("AB 481") requires law enforcement agencies to obtain approval from their respective local governing bodies before taking actions related to funding, acquisition, and/or use of military equipment, as defined by Government Code section 7070 (c), as that section may be amended from time to time; and

WHEREAS, AB 481, as codified in Government Code sections 7070 through 7075, requires that said approval by the local governing body must be accomplished by an ordinance adopting a military equipment use policy and that the adoption of said ordinance must occur at a regularly-scheduled meeting of that body pursuant to all applicable open-meeting requirements; and

WHEREAS, a local governing body may only approve the funding, acquisition, and/or use of military equipment within its jurisdiction if that body determines the military equipment use policy meets all legally-required standards; and

WHEREAS, the local governing body must review said ordinance at least annually to vote on whether to renew the ordinance, which must occur at a regularly-scheduled meeting of that body pursuant to all applicable open-meeting requirements; and

WHEREAS, AB 481 further requires that a law enforcement agency that receives approval for a military equipment use policy must submit to the local governing body an annual military equipment report for each type of military equipment approved by the governing body

within one year of approval and annually thereafter for as long as the military equipment is available for use; and

WHEREAS, the local governing body must determine, based upon the above-described report from law enforcement, whether each type of military equipment identified in that report has complied with the standards required by Government Code section 7071(d) and, if a type of military equipment is not in compliance, either disapprove a renewal of the authorization for that type of military equipment identified in that report or amend the military equipment use policy.

NOW THEREFORE, the Board of Supervisors of the County of Lake ordains as follows:

Section One: The recitals hereinabove are true and correct and incorporated herein by reference.

Section Two: Lake County Code Article XXIX is hereby added to Chapter 2 of the Lake County Code to read as follows:

"Section. 2-205. Title.

This article shall be known as, and may be cited or referred to as the "Lake County Military Equipment Use Ordinance."

Section. 2-206. Findings.

206.1. The Lake County Board of Supervisors finds and makes the following determinations in regard to the Military Equipment Use Policy of the Lake County Sheriff's Office (the "Policy") which is attached hereto and incorporated by reference herein:

a. The military equipment identified in the Policy is necessary because there is no reasonable alternative that can achieve the same objective of officer and civilian safety;

b. The Policy will safeguard the public's welfare, safety, civil rights, and civil liberties;

c. If purchasing the equipment, the military equipment is reasonably cost effective compared to available alternatives that can achieve the same objective of officer and civilian safety;

d. Prior military equipment use complied with the applicable equipment use policy (which includes equipment now defined as military equipment) that was in effect at the time, or, if prior uses did not comply with the accompanying military equipment use policy, corrective action has been taken to remedy nonconforming uses and ensure future compliance.

206.2. The Lake County Sheriff's Office has submitted the Policy to the Board of Supervisors and made the Policy available on the Sheriff's website for at least thirty (30) days prior to the public hearing concerning the military equipment at issue.

206.3. The Policy was considered by this Board as an agenda item during a regularly-scheduled meeting of this Board in open session in accordance with all Brown Act requirements.

Section. 2-207. Determinations.

207.1. The Lake County Board of Supervisors finds that the Military Equipment Use Policy of the Lake County Sheriff's Office (the "Policy") meets the requirements of Government Code sections 7070, et.seq., and this Board hereby approves and adopts said Policy which is attached hereto and incorporated by reference herein.

207.2 The Lake County Sheriff's Office shall submit an annual military equipment use report to the Board of Supervisors containing the information required by Government Code section 7072, as that code section may be amended from time to time, and the

Board of Supervisors shall determine whether each type of military equipment identified in that report has complied with the standards for approval set forth in section 2-206.1 hereinabove and Government Code section 7072.

207.3. If, in the course of the annual review of the report of the Sheriff's Office described in section 207.2 herein, the Board of Supervisors determines that a particular type(s) of military equipment identified in the report of the Sheriff's Office has not complied with the required standards for approval, the Board shall either disapprove a renewal of its authorization for that type of military equipment or require such modifications to the Policy as necessary to resolve that lack of compliance."

Section Three: The Board of Supervisors finds this ordinance is not a project within the meaning of Section 15378 of the California Environmental Quality Act ("CEQA") Guidelines, because there is no potential for it to result is a physical change in the environment, either directly or indirectly. In the event this ordinance is found to be subject to CEQA, it is exempt from CEQA pursuant to Section 15061(b)(3) of the CEQA Guidelines, known as the "Common Sense" exemption, because it can be seen with certainty that there is no possibility of a significant effect on the environment.

Section Four: All ordinances or parts of ordinances in conflict herewith are hereby repealed to the extent of such conflict and no further.

Section Five: This ordinance shall take effect on the 25th day of August, 2022 and before the expiration of fifteen days after its passage, it shall be published at least once in a newspaper of general circulation printed and published in the County of Lake.

The Foregoing Ordinance was introduced before the Board of Supervisors on the 19th day of July, 2022, and passed by the following vote on the 26th day of July, 2022.

AYES: Supervisors Simon, Sabatier, Scott, Pyska, and Crandell

NOES: None

ABSENT OR NOT VOTING: None

Luke Bingham
Sheriff - Coroner

Considerations:

The AB481-reportable equipment inventory sheets contained within this document were updated near end of fiscal year 25/26.

Regarding costs, funding, annual maintenance expenses, and the estimated effective lifespan, we have strived for maximum accuracy. However, we acknowledge that numerous unpredictable factors may directly impact these values.

Costs associated with the following items represent the best estimates at the time these document were prepared. Many of these items are not purchased from manufacturers, but from dealers, who adjust costs in accordance with market factors beyond the predictive abilities or control of the Sheriff's Office.

Due to the unpredictable nature of the law enforcement profession, many of the items estimated maintenance costs and effective lifespans are best estimates and may vary greatly on a year-to-year basis, due to the availability of training, type of operational incidents, or other factors.

In an effort to be as efficient as possible, many items have operational applications across a diverse set of the Sheriff's Office missions. For example, "40mm launcher" is an item that is utilized by Patrol, SWAT, Corrections and other auxiliary assignments. The cost and unit allocation estimates are our best projections of the requirements needed to fully meet the needs of the Sheriff's Office.

Additionally, there are costs for non-AB481 equipment that are inherently linked to the costs of the following items. For example, slings, carrying cases, magazines, sighting systems, flashlights, cleaning supplies, batteries, training, and other non-AB481 reportable items are not included in the cost estimates, unit allocations, or maintenance sections of the following documents.

The legislature has designated these items as "Military Equipment." While the military may use some of the same equipment, the Sheriff's Office deems all of this equipment as law enforcement equipment. Much the same as the military using handcuffs, there are items in common. The manner and reason they are used is significantly different.

For many years, this office has displayed and offered education about our equipment and why we use it. The vast majority of equipment on this list was approved for funding through the County of Lake. From our Citizen's Academy to National Night Out, we have always been open for discussion and education.

Manufacturer Product Information

Manufacturer	Model	Type
CTS	5231 CS	CS Chemical Munition

Equipment Description

2-chlorobensalmalononitrile (CS) Riot triple phaser smoke canister.

Equipment Capabilities

Chemical Agents handheld canister devices can be used to conceal tactical movement. They can be used in crowd control management during riotous behavior as well as tactical deployment situations to detect and/or dislodge barricaded subjects.

Purpose of Equipment

The purpose of Chemical Agents handheld canister devices is to minimize the risks to all parties through pain compliance, temporary discomfort, and/or incapacitation of potentially violent or dangerous subjects. The different configurations allows for indoor or outdoor deployments.

Authorized Equipment Use

Deputies must successfully complete department-approved training by certified instructors to be authorized to use Chemical Agents handheld cannister devices. Use of Chemical Agent canister is restricted to CRU and SERT members.

Legal and Procedural Rules Governing Use

Use of the Chemical Agents handheld canisters shall conform to all SO policies, including but not limited to Policy 300, 467, 708. Must also maintain compliance with local, state and federal storage, transportation and handling regulations and all relevant local, state and federal use of force legislation.

Manufacturer Product Information

Manufacturer	Model	Type
Smith & Wesson	33	Canister Launcher

Equipment Description

12ga Canister launcher

Equipment Capabilities

Device is affixed to a 12ga shotgun and using a blank cartridge is capable of launching specified chemical agent canisters in crowd control, barricade subject or hostage incidents.

Purpose of Equipment

Launching device provides the operator with the ability of projecting the specified chemical agent canisters. The use of the Launching device will project the canister further than can be hand delivered. This increases the distance between law enforcement and crowds or structures reducing the chance for injuries to both parties.

Authorized Equipment Use

Deputies must successfully complete department-approved training prior to use of the launching device. Use of the launching device is restricted to CRU members.

Legal and Procedural Rules Governing Use

Use of the launching device shall conform to all SO policies, including but not limited to Policy 300, 467, 308, 708.

Manufacturer Product Information

Manufacturer	Model	Type
CTS	4340 OC	OC 40mm Barricade

Equipment Description

The barricade 40mm Round is a frangible projectile filled with chemical agent. It is designed to deliver chemical agents in barricade situations from a 40mm launcher. It is available with either liquid or powder carrier for the agent. The payload can hold OC (Oleoresin Capsicum) or CS (Chlorobenzylidenemalononitrile). Spin stabilization from barrel rifling affords maximum stand-off distance and accuracy for safety.

Equipment Capabilities

The barricade 40mm Round is non-burning and suitable for indoor use. Used primarily by tactical teams, it is designed to penetrate barriers, such as windows, hollow core doors, wallboard and thin plywood. Upon impacting the barrier, the nose cone ruptures and instantaneously delivers a small chemical payload inside of the structure or vehicle.

Purpose of Equipment

It is primarily used to dislodge barricaded subjects from very small confined areas. Its purpose is to minimize the risks to all parties through pain compliance, temporary discomfort and/or incapacitation of potentially violent or dangerous subjects.

Authorized Equipment Use

Deputies must successfully complete department-approved training by certified instructors to be authorized to use deploy 40mm barricade munitions. Use of 40mm barricade munitions is restricted to CRU members.

Manufacturer Product Information

Manufacturer	Model	Type
CTS	4630 CS	CS 40mm Muzzle Blast

Equipment Description

The 40mm Muzzle Blast Rounds incorporate an aluminum shell and utilize smokeless powder as the propellant. The 40mm Muzzle Blast Rounds are designed to deliver chemical agents in the immediate area (30 feet). The 40mm Muzzle Blast Round is available in OC (Oleoresin Capsicum) or CS (Chlorobenzylidenemalononitrile). 40mm Muzzle Blast is deployed from a 40mm launcher.

Equipment Capabilities

The 40mm Muzzle Blast Rounds are normally used as a crowd management solution for the immediate and close deployment of chemical agent in crowd control management during riotous behavior. However, it has proven successful during tactical operations. As a pain compliance round for riot management, the 40mm Muzzle Blast Rounds are a device for deploying chemical laden powder at close ranges for indoor or outdoor operations.

Purpose of Equipment

The purpose of the Muzzle Blast Round is to minimize the risks to all parties through pain compliance, temporary discomfort, and/or incapacitation of potentially violent or dangerous subjects.

Authorized Equipment Use

Deputies must successfully complete department-approved training by certified instructors to be authorized to use deploy 40mm muzzle blast munitions. Use of 40mm muzzle blast munitions is restricted to CRU members.

Manufacturer	Model	Type
Def Tech	1090	Stinger Impact Device

Equipment Description

The Stinger device is a combination Less than Lethal Impact Munitions and Distraction Device that may incorporate optional CS (Chlorobenzylidenemalononitrile) or OC (Oleoresin Capsicum) laden powder, if desired. The Stinger device is a maximum effect device as it delivers up to four stimuli for psychological and physiological effect: rubber pellets, light, sound, and optional chemical agent or OC.

Equipment Capabilities

The Stinger impact device is most widely used in crowd control management during riotous behavior as well as tactical deployment situations to detect and/or dislodge barricaded subjects. Upon deployment, the blast is sufficient to project the rubber balls (32 cal. /60 cal. Option) and optional chemical agent in a 50 foot radius.

Purpose of Equipment

The purpose of the Stinger impact device is as a less than lethal munition to minimize the risks to all parties through pain compliance, temporary discomfort, and/or incapacitation of potentially violent or dangerous subjects.

Authorized Equipment Use

Deputies must successfully complete department-approved training by certified instructors to be authorized to use deploy the Stinger impact device. Use of the Stinger impact device is restricted to CRU and SERT team members.

FN	303	Compressed Gas Launcher

Equipment Description

.68 caliber compressed gas launcher that delivers frangible projectiles filled with oleoresin capsicum, a chemical agent the is non-burning and suitable for indoor use.

Equipment Capabilities

Capable of delivering .68 caliber projectile up to 100 ft at great accuracy with 7.3-11 ft lbs of kinetic energy.

Purpose of Equipment

This system is used to disperse and control incarcerated subjects who are violent or who demonstrate the intent to be violent, or during riots, refusals to lock-down, or physical altercations with numerous individuals. When used properly this system is less likely to result in death or serious physical injury and can be used in an attempt to de-escalate a potentially violent situation.

Authorized Equipment Use

Deputies must successfully complete department-approved training by certified instructors to be authorized to use deploy the FN Model 303. Use of the FN Model 303 is restricted to CRU and SERT team members.

Legal and Procedural Rules Governing Use

Use of the FN Model 303 shall conform to all SO policies, including but not limited to Policy 300, 308, 708. Must also maintain compliance with local, state and federal storage, transportation and handling regulations and all relevant local, state and federal use of force legislation.

CTS	2581	Super Sock

Equipment Description

The 12-Gauge Drag Stabilized Munition is comprised of a translucent 12-Gauge shell loaded with a 40 gram, tear shaped bag made from a cotton and ballistic material blend and filled with #9 shot.

Equipment Capabilities

12-Gauge Drag Stabilized munition is a point-of-aim, point-of-impact, direct-fire munition that is most commonly used in situations where greater accuracy and deliverable energy is desired for the incapacitation of an aggressive, non-complaint subject at longer distances.

Purpose of Equipment

These are considered Less Than Lethal Impact munitions. The munition is deployed from a designated and clearly marked less lethal 12-gauge shotgun. commonly used in situations where greater accuracy and deliverable energy is desired for the incapacitation of an aggressive, non-complaint subject. These are considered Less Than Lethal Impact munitions

The 40mm barricade projectile is non-burning and suitable for indoor use. Used primarily by tactical teams, it is designed to penetrate barriers, such as windows, hollow core doors, wallboard and thin plywood

Purpose of Equipment

It is primarily used to dislodge barricaded subjects from very small confined areas. Its purpose is to minimize the risks to all parties through pain compliance, temporary discomfort and/or incapacitation of potentially violent or dangerous subjects.

Authorized Equipment Use

Training only by certified CRU team members

Legal and Procedural Rules Governing Use

Use of the 40mm barricade projectile shall conform to all SO policies, for training only.

Training Requirements

Initial training by certified instructor. Annual update training.

Manufacturer Product Information

Manufacturer	Model	Type
Def Tech	Supper Sock / Bean Bag	Drag Stabilized

Equipment Description

The 12-Gauge Drag Stabilized munition is comprised of a translucent 12-Gauge shell loaded with a 40 gram, tear shaped bag made from a cotton and ballistic material blend and filled with #9 shot.

Equipment Capabilities

12-Gauge Drag Stabilized munition is a point-of-aim, point-of-impact, direct-fire munition that is most commonly used in situations where greater accuracy and deliverable energy is desired for the incapacitation of an aggressive, non-complaint subject at longer distances.

Purpose of Equipment

Training Only.

Authorized Equipment Use

Deputies must successfully complete department-approved training by certified instructors to be authorized to use deploy 12ga. Super Sock munition. Use of 12ga. Super Sock munitions is restricted to certified deputies for training only.

Legal and Procedural Rules Governing Use

Use of the 12ga. Super Sock munition shall conform to all SO policies, including but not limited to Policy 300, 308, 708. Must also maintain compliance with all relevant local, state and federal use of force legislation.
